A high quality metalised knitted reflective screen which is flexible, light, strong and easy to spread. Provides optimal diffused light transmission to the crops. Prevents radiation in plants and fruits and reduces heat in greenhouses during hot days. They are very efficient for energy conservation in the winter and at night.

RION Greenhouses

Open 7 days
9-5pm

SAFE, STURDY 7 DURABLE:

Polycarbonate is extremely strong, safe and will not shatter or break like glass. Combined with PVC profiles, the construction characteristics allow the structure to be wind resistant and hold up to 500kg of snow.

EASY TO ASSEMBLE:

Innovative PUSH 7 FIT Rion Connectors enable you to build the greenhouse yourself, saving time & money. No tools necessary.

PVC MODULAR STRUCTURE:

The modular nature of the greenhouse allows you to decide which size suits you. The PVC framework means the greenhouse is corrosion free.

TWIN WALL POLYCARBONATE

Characteristics of:

Light Transmission

Greater light transmission compared with all other covering materials.

Diffused Light

Transmission haze is superior to single wall polycarbonate. It greatly reduces light being radiated directed onto plants and minimizes shadows, encouraging uniform growth.

Thermal Insulation

Superior thermal insulation with an R factor of 1.38. This reduces energy loss during winter 50% more than single wall polycarbonate.
